

Compilation Techniques: Laboratory

Project Submission

Giuseppe Lomurno, University of Pisa

May 13th, 2026

Steps

- ➊ Register for a session on the portal `esami.unipi.it`
- ➋ Submit the project via mail
- ➌ Agree on a date for the oral exam
- ➍ Pass the exam

Deadlines

The project submission deadline is the day you registered for
You can submit until midnight

Available dates in the near future

- June 9th
- June 30th
- July 22nd

Register on the portal, otherwise your submission will be discarded

Submission

Submit via mail to `giuseppe.lomurno@phd.unipi.it`

The subject must be exactly `[0073A] Compilation Techniques Project Submission`

The body must contain your full name and your student number

Attached there must be a single ZIP archive containing:

- Source code (examples and other tools can be helpful for evaluation)
- Instructions on how to build/run/test
- A PDF report

After submission you will receive an acknowledgment within 24 hours, otherwise contact me

Source Code

Submit clean, documented code

Do not leave unhelpful or commented code

Write down detailed instructions on what language/library/building system is needed

List all commands needed to build, run, test the code

If you have developed other tooling, also list instructions for it

If I cannot build/run/test your code, you will be contacted to resolve as soon as possible

Failure to do so will result in exclusion

Report

The report should be brief but provide a detailed overview of all design decisions

Within the report there should be the answer to the question written in each project fragment

Remember, the report is meant to be read from someone with zero knowledge of the project:
be clear, do not assume

Also, the report is not a substitute to good comments and clear code:
it is an overview, not API documentation

Next Steps

After 7-10 days from the deadline we will agree on a calendar for the oral exams

During the exam I will inquire about the project and the report
